

Know and manage your network performance

Envision the performance of your network in real time via the cloud and utilize data for optimal outcomes.

KEY FEATURES

- Telco-grade real time performance monitoring and reporting for Tait DMR Tier 3 and P25 Trunking networks
- Multi-network integration – monitor up to three* DMR Tier 3 or P25 Trunked networks with one instance of Tait EnableFleet
- Cost-effective, simple, and easy to use
- Cloud based secure access, anywhere, anytime
- Real time automated data processing and visualization, integrating multiple data sources
- Advanced dashboard style presentation
- Valuable pre-set dashboard views, with optional customization
- Wide range of automated outputs and alerts
- Reporting and analysis of historical data
- Trend analysis for prediction of future compliance to Key Performance Indicators
- Role based management
- Audit log
- Redundancy and automatic back up options
- Range of optional service capabilities available as part of a Tait support contract

*Contact Tait or an authorized channel partner for support on larger networks.

FEATURES AND BENEFITS

Reduced detection to resolution time

Traditional methods of performance management rely on a historical reporting approach, often with manual and complicated steps leading to significant time investment, resulting in delayed resolution of performance issues. Tait EnableInsight provides automated event analysis and instant assessment and notification, facilitating a reduced timeframe from problem awareness to resolution. You can rest easy, because you'll be the first to know.

Enhanced control and management

Manage your solution's performance and compliance to KPIs. Tait EnableInsight allows you to pinpoint the sites that are carrying too much traffic and may be causing excessive queuing on the network. Real time visibility of these issues allows network managers to take proactive action to minimize impact, resulting in improved access and performance of the radio system.

Proactive response and confidence in KPI achievement

In addition to monitoring current activity, Tait EnableInsight utilizes 'trending' to enable network operators to forecast the cumulative impact of

degraded system or business performance across your mandated reporting period. Improved visibility allows you to rectify problems before they become business-critical issues, an effective insurance policy against compromised performance in time limited, SLA-based environments. Greater confidence in the performance of the solution results in greater satisfaction of end users and customers.

Reduced training needs

Most traditional monitoring solutions rely on expert users to operate and analyze data. Tait EnableInsight is an intuitive solution designed to provide reduced reliance on skilled, multidisciplinary operators. It includes dashboard style information that can be accessed by senior management much more easily than getting the data from traditional network reporting tools.

Flexible provisioning as part of a Tait service contract

Tait EnableInsight, as part of a Tait support contract enables the availability of a range of service provision options, depending on which service contract is in place.

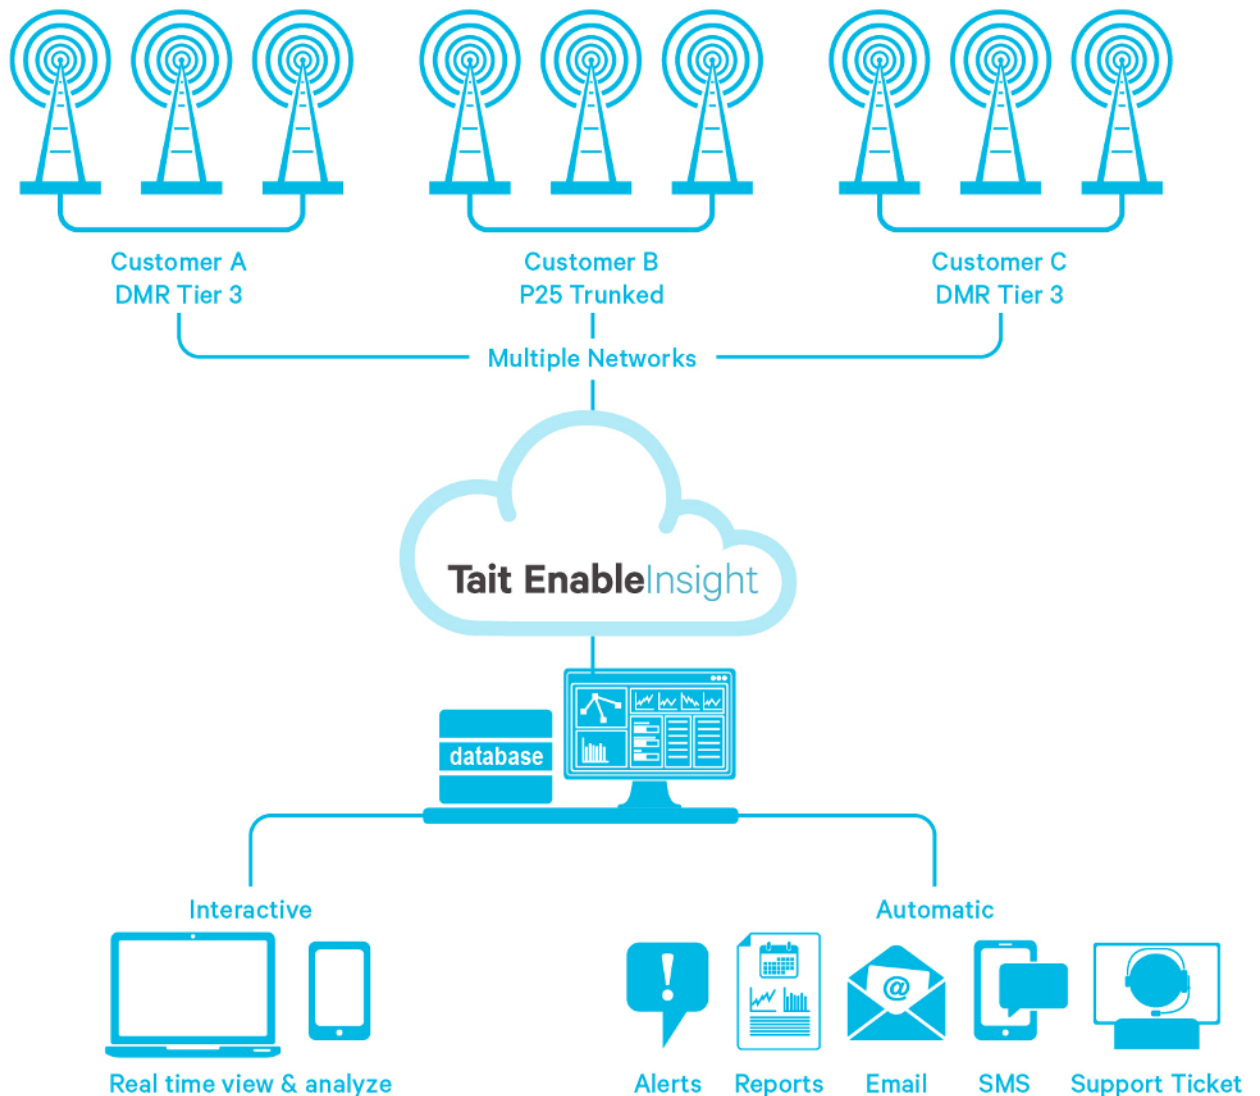

For **Tait Service Advantage** customers, Tait EnableInsight adds real time performance reporting, delivered via the cloud. Customers

gain access to reports which can be run retrospectively and the opportunity to buy additional reports at any stage throughout the support period.

For **TaitWatch** customers, Tait EnableInsight complements existing network monitoring and notification services with Tait personnel providing a brief commentary on exceptions picked up in the data capture by Tait EnableInsight. Access to reports which can be run retrospectively and the opportunity to buy additional reports at any stage throughout the support period.

For **Tait Manage Infrastructure** customers, Tait EnableInsight brings telco-grade, real time performance reporting and full network monitoring and control. Customers gain added value in having qualified Tait personnel review and assess Tait EnableInsight data to deliver in-depth analysis and event correlation as well as suggestions for network performance optimization all as part of delivery of a Tait managed service. Customers also have access to future upgrades of the Tait EnableInsight "engine" ensuring the latest "always on" capabilities are available. There is access to the selected regular reports and the opportunity to swap out for a different report at an agreed point in each quarter.
